Intellectual Property Rights

The FieldComm Group (the Group) does not knowingly use or incorporate any information or data into the HART, FOUNDATION Fieldbus and FDI protocol standards, which the Group does not own or have lawful rights to use. Should the Group receive any notification regarding the existence of any conflicting private IPR, the Group will review the disclosure and either (A) determine there is no conflict; (B) resolve the conflict with the IPR owner; or (C) modify the standard to remove the conflicting requirement. In no case does the Group encourage implementers to infringe on any individual's or organization's IPR.

Revision Log

Version	Date	Change Note / History / Reason
1.0	28 January 2020	First Release
2.0	31 May 2024	Modified existing TFS to Reserved that are no longer applicable due to the Standard DDs introduced in IDE 1.5.0 along with the Import/Redefinition Macros. Other test points were required to cover the macros in the standard DD. Editorially, moved sections and test points between sections because they were in wrong section, editorial changes.
